Why Women's Time?

THE LANCET

"The Series identifies a set of ten proven nutrition-specific interventions, which if scaled up from present population coverage to cover 90% of the need, would eliminate about 9000000 deaths of children younger than 5 years in the 34 high nutrition-burden countries—where 90% of the world's stunted children live."

"More research is needed to <u>improve the</u> <u>effectiveness</u> of existing interventions... to ensure that nutrition interventions <u>reach</u> the populations with greatest need... into the <u>barriers</u> to effective implementation..."

2014 GLOBAL NUTRITION REPORT ACTIONS AND ACCOUNTABILITY TO ACCELERATE THE WORLD'S PROGRESS ON NUTRITION

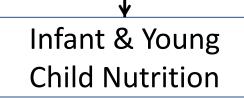

"... it is not merely coverage that needs to be scaled up, but the <u>effective coverage</u> [vulnerable groups engaging in interventions] and impact of programs."

Creating Capabilities

(Nussbaum, 2011)

Agriculture & Nutrition Programs

Women's Time Matters!

Research Aim

"If we care about what we measure, we should measure what we care about."

To detail an approach for developing a contextspecific and rapid tool to assess women's time allocation in LMICs.

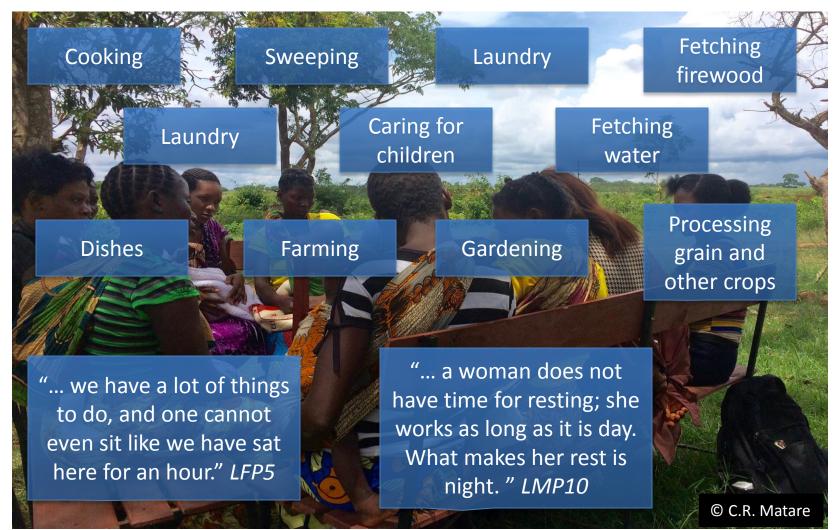

Methods & Results

Focus Group Discussions

immana

Focus Group Discussions

Cognitive Testing

- 1. Investigate how well questions perform when given to survey respondents.
- 1. Identify potential sources of response error.
