

# Sub-Saharan Africa Caregiver Mental Health Knowledge Sharing Series

## About the Series

There is growing global recognition that caregiver mental health is a critical component of the health and development of their children as well as the wellbeing of caregivers themselves.

The Caregiver Mental Health Knowledge Sharing Series aims to:

- Promote the exchange of knowledge, evidence, and resources between stakeholders on caregiver mental health
- Identify opportunities for increased attention to and funding for integration of mental health interventions into health, food security, and nutrition programming;
- Drive future research and implementation to fill current gaps
