

THE SUB-SAHARAN AFRICA CAREGIVER MENTAL HEALTH KNOWLEDGE SHARING SERIES

OCTOBER 20 & 27 AND NOVEMBER 10 & 17 2020

Caregiver mental health and its profound effect on food security and nutrition, early childhood health and development, other learning, socioemotional and economic outcomes is quickly becoming a priority for the global health community.

JOIN WITH FELLOW IMPLEMENTERS, RESEARCHERS, AND ADVOCATES TO:

Learn from others and share practical insights...

Implementers will have the opportunity to learn from and dialogue with each other, be heard, and give voice to others.

Join a network of people focused on caregiver mental health...

Researchers can deepen their understanding of real-life caregiver mental health initiatives and identify new points of entry for critical implementation research while joining a network of people interested in applying research to influence advocacy, policy, and funding for caregiver mental health.

Find opportunities to advance caregiver mental health goals...

Advocates can engage with implementers and researchers, identify case studies, and review compelling data to inform policy and advocacy.
